ISSUES TO BE DISCUSSED DURING THE SYMPOSIUM:

- The spread of flood and mudflow in the world (global and regional analysis)
- Prognosis and dynamics through the modern technologies and GIS methods
- Flood and mudflow within the context of global warming
- Monitoring, prognosis and security issues
- Modern preventive constructions for flood and mudflow
- Safety and vulnerability of the constructions
- Ecological-economical basis for fighting against flood and mudflow, management and social problems
